- Data** The data is based on an electronic version of Daniel A. Werning. *Das Höhlenbuch*, Vol. 2: *Textkritische Edition und Übersetzung*, Wiesbaden 2011: Otto Harrassowitz.
The secondary additions to the text, which mention the name of the king, are left out.
Abbreviation: **Hb**.
- Data mining** The phrases that contain a Direct Genitive construction were primarily collected by looking for hyphens "-" without blanks before or after it.
The phrases that contain an Indirect Genitive construction were collected by looking for the various possible transliterations of the connector word "ni" ("ni", "ni.t", "ni.w", "ni(.t)", ...).
